DETAILED ACTION

Allowable Subject Matter

Claims 1-16 allowed over the prior art.

The following is an examiner's statement of reasons for allowance:

Although the prior art disclose several claimed limitations, for example: Budin et al. discloses a multiple access communication system, which includes one or more hub units, a plurality of station units associated with each of the hub units, and a link means for establishing a bidirectional communications link between each of the hub units and its associated station units, a bidirectional communication link is characterized in downlink means for establishing a unidirectional downlink radio frequency signal path from each of the hub units to all of the associated station units at a predetermined frequency and uplink means for establishing a unidirectional uplink radio frequency path from each of the station units to all of the associated hub units at a second predetermined frequency.

For claim 1, 3, 5, 8, 11-15, none of the prior art teach singularly or in combination a remote maintenance repeater and an internetwork connector used in a remote monitoring system. The remote maintenance repeater has a command transmitting unit that transmits a command to a transfer destination device, which is an internetwork connector or another remote maintenance repeater, at a specific frequency specific to the transfer destination device. The internetwork connector has a radio result

transmitting unit to transmit a result of execution by radio at the predetermined frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
